

Manufacturer of monitor systems

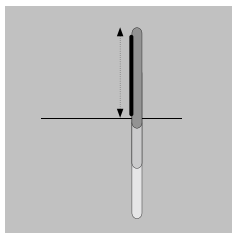

ELEMENT ONE develops and manufactures adjustable, integrated monitor systems and digital information screens „digital signage“. For greater dynamism and flexibility in communicating, **for greater efficiency in presentations and sales** but also for freeing up space in order for people to meet.

Come and explore your plan with us! Conference or training rooms, entrance or reception areas, consultation spaces, boardrooms or shopping centres, modern, digital forms of communication are an indispensable tool for all aspects of life.

ELEMENT ONE, a company in the Data Display Group, provides attractive and functional solutions for multi-media and ensures that your communication processes are more open and dynamic without being domineering.

Credit institution under reconstruction, Frankfurt a. Main
Large conference room

Clear layout of the monitors. Easy view of the screens. Effectiveness and ergonomics as part of a meeting culture – for complete concentration on the essential.

CONVERS 170: one button and the monitor appears vertically above the tabletop or disappears below it.

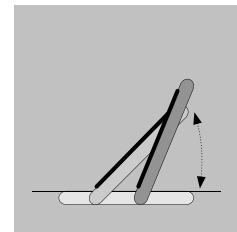

**Bertelsmann Hauptstadt-Repräsentanz, Unter den Linden, Berlin
Lounge area**

A perfect combination of minimalism, elegant materials and top-quality technology.

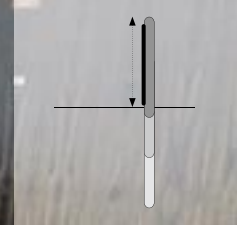

VERSIS 170: the monitor can be lowered electronically face up into the table top.

CONVERS 190: one button and the monitor appears vertically above the tabletop of disappears below it.

**Mercedes-Benz Museum,
Stuttgart, conference room**

Technically top-quality equipment
for conference tables for the
executive committee.

CONVERS 190, in-built and positioned
at an angle on each table, the media is controlled
centrally at the secretarial desk.

VERSIS 170 integrated into the presentation console.

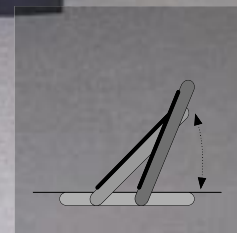

**Nordmetall Federation of Employers, House of Industry and Commerce, Hamburg
Meeting room**

Extraordinarily innovative and open. The latest in modern communication and presentation equipment, integrating each participant equally in the session.

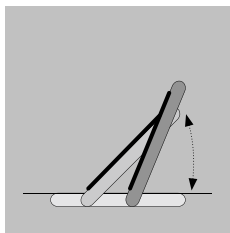

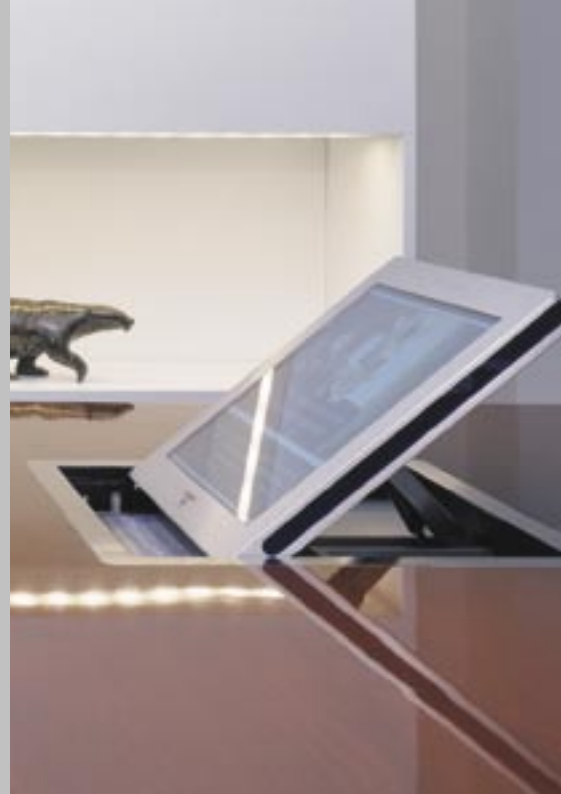

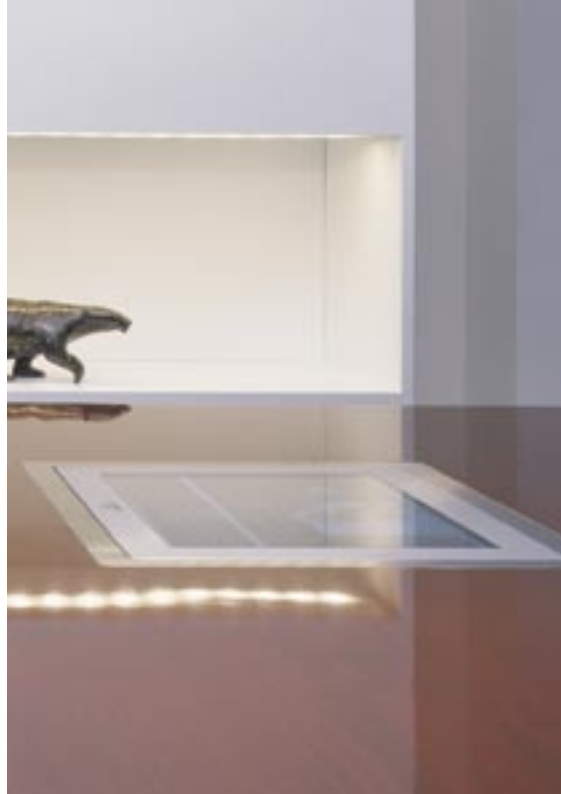

VERSIS 170: the monitor can be lowered electronically face up into the table top.

**Intelligent House Solutions, Berlin
Residence**

In conjunction with qualified architects, an intelligent room design emerged, equipped with high-tech multimedia. Monitor integrated flush into a maple table with multi-layered varnish.

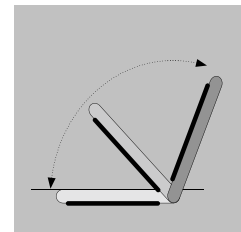

VERSIS 170: the monitor can be lowered electronically face up into the table top.

Fundación ONCE, Madrid
Conference room

An elegant technical solution for previewing and watching presentations and a fascinating, representative room design for staff and the public – without the technology becoming the centre of attention.

MODIS 170 Basic: the monitor folds shut electronically and the keyboard disappears into the table.

**Telekom, headquarters in Bonn
Entrance hall**

Integrated monitors in reception. The reverse side of the monitor, laminated to look like the wood desk, communicates representative optics.

AEK Bank 1826, Thun

Counter at a bank, consultation area

Time-bund consultation culture which uses smart technology to support face to face conversations and technical support.

MODIS: the monitor folds shut electronically and the keyboard disappears into the table.
